PROFESSIONAL SUMMARY

Development supervisor and software developer experienced in enterprise solutions with Power Platform, .NET, React, and TypeScript. I manage product evolution from discovery and feasibility through prioritization, delegation, and delivery. I take ownership of problems and use AI to explore and validate faster while remaining accountable for technical decisions, quality, and outcomes.

PROFESSIONAL EXPERIENCE

Circo Studio | Projects for YPF | March 2024 - Present

Development Supervisor and Power Platform Developer

- Manage the day-to-day evolution of a cross-company corporate application: gather requests with the client user and functional analyst, assess feasibility, estimate, prioritize, and delegate work.
- Document use cases and validations; perform functional testing and capture evidence with Azure DevOps Test & Feedback to support releases and issue tracking.
- Manage roles and permissions across Dataverse, SharePoint sites and groups, and Microsoft Entra ID groups, aligning access with each user profile's responsibilities.
- Built and continue to evolve a reusable Power Apps UX framework with the design team; coordinate improvements, delegate tasks, and train new team members to sustain consistency and reuse.

SELECTED PROJECTS

WIRIN | Backend Developer | Academic team project | 2025 - Present

- Contributed mainly to the backend of a bibliographic accessibility system: ASP.NET Core Web API on .NET 8, Entity Framework Core, JWT, SQL Server/PostgreSQL, and Azure OCR integration.
- The team presented WIRIN at the 23rd University Digital Library Conference and is validating the product with UNLaM's library before a potential formal implementation.

Local personal applications | AI-assisted development | 2026

- Defined and built React and TypeScript tools for personal finance management and academic tracking, prioritizing real needs, privacy, and local persistence.

EDUCATION

Bachelor's Degree in Technology Management | Universidad Nacional de La Matanza | 2026 - 2027 | In progress

University Degree in Web Development | Universidad Nacional de La Matanza | 2022 - 2025 | GPA: 8.6/10

Electronics Technician | Instituto San José (A-355) | 2014 - 2019

SKILLS

Power Platform: Power Apps, Power Automate, Dataverse, SharePoint, role and permission management

Development: .NET 8, ASP.NET Core Web API, React, TypeScript, Angular, Node.js

Data, Azure, and delivery: Entity Framework Core, SQL Server, PostgreSQL, Azure, Azure DevOps, Git, Test & Feedback

LANGUAGES AND TRAINING

Spanish: native | English: upper-intermediate, Cambridge First-oriented coursework and functional workplace communication | Portuguese: A2 course completed

Data Science course | Universidad Tecnológica Nacional (UTN) | November 2024
